

How does biomass earn an income?

Commercial energy rates are set to double in the next five years. Biomass offers a reliable alternative heat source that is low cost and generates additional revenue from the RHI.

Arrange a free no-obligation survey with Mike, our Biomass Expert, to find out if a biomass system is right for you

How Does it Work?

Generate - you are paid for *all* heat you generate under the government Renewable Heat Incentive (RHI).

Save - biomass fuel is considerably cheaper than traditional heating fuel such as LPG and heating oil.

Combined fuel savings and revenue from the RHI make biomass a very attractive investment opportunity

How Much Will I Earn?

Here is an example typical 100kWp system that replaces an existing heating oil system

Current annual fuel cost - £8,410
 Biomass annual fuel cost - £5,387
 Year 1 savings and revenue - £13,573

The ROI is 42% and the system pays back in 3.3 years

Investment Year 1

Subsidies (Renewable Heat Incentive)
 Fuel purchase savings from the 'big six'

Total Revenue Year 20
